Taking Conservation Funds

The State has a dedicated goal of 20% of our land dedicated to open space by 2021 and is way off pace to meet that goal. Now it is proposed to rob the funds dedicated to conservation and land aquisition to bolster deficit spending in the General Fund. This is outrageous and lowers the credibility of the Legislature when it passes a bill to dedicate funds and then siphons off those funds for other purposes. Needless to say I am opposed and disappointed at the Governor's Legislature's majority lack of support for conservation in our state.
